

- TERRACOTTA
- QUARRY TILES
- PORCELAIN

WHAT IT'S FOR

- Removes heavy building site dirt and residues.
- Removes any saline efflorescence.
- Cleaning and descaling action.
- Recommended for terracotta when ordinary buffered acid descaling cleaners are ineffective.

ADVANTAGES

- Does not emit fumes that are harmful to users or the environment: a welcome substitute to muriatic acid.
- Contains sanitizing agents.
- Unlike pure acids which react within a few seconds, FILAPHZERO has a prolonged descaling action.
- Due to its gel-like consistency, it is ideal for use on vertical surfaces.
- All-in-one descaler and detergent: contains high concentrations of surfactants.

HOW IT'S USED

Dilution: 1:5 – 1:10 depending on the type of dirt to be removed

Application:

Wet the surface with water before applying the product

1. Spread over the surface and leave to act for a few minutes.
2. Clean using a single disc professional cleaner fitted the most appropriate disc (e.g.: brown for terracotta) or a floor cleaning brush.
3. Vacuum or wipe up residue.
4. Rinse with plenty of water.

If some areas are still dirty, repeat the wash with a more concentrated solution. For vertical surfaces: use undiluted and leave to act for a few minutes. Rinse with water-jet spray.

Caution:

Use with caution and only when necessary. Best with a professional single-disc cleaner and vacuum drier. Do not use FilaPHZero on marble and generally on acid-sensitive materials. Wear gloves when handling the product even if diluted. We advise checking the reaction on a small portion of the surface before applying the product.

DILUTION AND COVERAGE

With one litre (1,06 QT):

Terracotta 1:5	20 m ² (215 sq ft)
Porcelain 1:5	40 m ² (430 sq ft)

"Coverage rates are approximate and refer to a single coat of the product"

Packaging

5 liter (1.32 US gal) flasks in box of 4.

PRECAUTIONS

- Keep out of the reach of children.
- Dispose of the container properly after use.

TEMPERATURE

Storage temperature:
between 41° F (5° C) and 86° F (30° C).
Must be applied to material at temperatures
between 41° F (5° C) and 86° F (30° C).

LABELLING

CORROSIVE
Warning: DANGER!
Hazard statements: CASUSES
BURNS TO SKIN AND EYES

Precautionary statements:
Product mists can burn respiratory tract and will cause burns if swallowed. Keep Out of the Reach of Children. Contains phosphoric acid and hydrochloric acid.

First aid: In case of eye contact, flush eyes with running water for 15 minutes. Get immediate medical assistance. On skin – Flush with running water. Remove contaminated clothing. If irritation persists or burns are present get medical assistance. If swallowed obtain immediate medical attention. Do not induce vomiting. If inhaled, remove to fresh air. If

breathing is irregular or irritation persists seek medical attention.

TECHNICAL INFORMATION

Appearance: colorless to pale brown liquid
Odour: pungent
Density: 1.115 kg/litro
pH(10% solution): 1.0
